Subject: Full production during Corona Virus

Dear Valued Customer:

At Pacer Industries, Inc, the safety and well-being of our employees and our customers is always our priority and we recognize the important role we play in providing our grinding wheels for your continued operations.

**We are fully operational and able to fill all grinding wheels orders,  
shipping in 3-4 weeks, or less.**

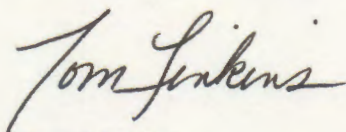

We are actively monitoring the COVID-19/Coronavirus situation and do not foresee any interruption in our capabilities to supply grinding wheels. In an ongoing effort to maintain continuity, we identified potential shortages of raw materials that come from impacted areas globally and obtained additional inventory in order to mitigate production interruptions.

We are closely monitoring updates from the Centers for Disease Control and the World Health Organization regarding COVID-19. We will continue to seek guidance from these agencies, public health officials and government agencies.

We are committed to meeting your ongoing needs and will make every responsible effort to continue uninterrupted supply of your grinding wheels.

Sincerely,

PACER INDUSTRIES, INC.

Tom Linkins  
Vice President, Sales and Marketing
